Web: LWC, VueJS, VueX, BackboneJS, JQuery, AngularJS, HTML5 Canvas

EXPERIENCE

Salesforce | San Francisco, California

Senior Software Engineer | May 2021 – Present

- [Sales Account Research](#) - Designed and created Salesforce Account Research, an end-to-end generative AI solution that orchestrates web-based company research, prompt-driven insight generation with source citations, and seamless updates to Account and Account Plan fields.
- [Einstein Summary](#) - Developed the beta version of an AI-powered CRM record summarization feature supporting Account, Opportunity, Contact, and Lead records, and subsequently onboarded it to the Einstein platform framework to enable greater customization, extensibility, and enterprise-grade security.
- Implemented a virtual entity solution to optimize Salesforce's [Your Account application](#), improving performance by over 90% for subscription management and license purchasing operations.
- Designed and built a configurable digital credential verification service that initially validated health credentials such as Smart Health Cards and laboratory test results, later evolving into a general-purpose platform for verifying digital credentials across use cases. Named inventor on **U.S. Patent US12399963B2**.

Flock IS, Inc. (acquired by Paychex) | San Francisco, California

Software Engineer | Apr 2018 – May 2021

- Built a billing module serving ~1,000 small and medium-sized businesses, generating monthly benefits invoices, reconciliation reports, and retroactive adjustments for client companies and their benefits providers.
- Developed a data migration tool that streamlined client onboarding, processing employee profiles and their dependents in bulk—onboarding 3,000 employees and their families in an average of 20 minutes.
- Optimized reporting and data compatibility-checking jobs by fine-tuning SQL queries and batch processing, reducing processing time by 40%.

Unimedia Solutions, LLC | Ulaanbaatar, Mongolia

Software Developer | Nov 2015 – Apr 2017

- Developed the client-side BPO (task creation) component of a crowdsourcing platform for the Japanese market, connecting clients with users to complete tasks that cannot be performed by computers. crowd-job.com

EDUCATION

- Maharishi University of Management | Fairfield, Iowa
M.S. in Computer Science | Apr 2017 – Jun 2019
- Mongolian University of Science and Technology | Ulaanbaatar, Mongolia
B.S. in Software Engineering | Sep 2011 – Jan 2015
